Stocks

[By The Associated Press]

Continuance of the extreme heat contributed largely to the further curtailment of stock market trading dealings falling to the smallest total since the early months of the year.

The extraordinary exhibit of the United States Steel Corporation for the second quarter, with its significant appropriation for war taxes and profits, was almost the one topic in financial quarters and acted as a brake upon bearish activity.

With two exceptions—Central Leather and Industrial Alcohol—in which gross advances of about 3 points were scored, price changes extended from mere fractions to barely 2 points, though mainly upward.

United States Steel registered the maximum of 124%, reacted a point and closed at 124%, a net gain of a point. Other steels and the more active equipments and war shares followed the course of their leader in the main.

Rails, metals and shippings were featureless most of the session, although a broad inquiry for low-priced or recognized transportation issues developed before the close. Important railroads submitted June statements of earnings, some of which left much to be desired from the bull standpoint.

Bonds were firm on limited offerings. United States bonds (old issues) were unchanged on call.
